

Build Knowledge into Practice Sessions | Syllabus

For clients and prospective clients only

Neuhaus Education Center's Build Knowledge to Practice Sessions are designed to provide educators with the opportunity to reflect and apply what they've learned in the [Neuhaus Structured Literacy Modules](#). After completing a set of three asynchronous modules, participants will take part in a 45- minute live-virtual, synchronous Build Knowledge into Practice session to deepen understanding and connect learning to practice.

These sessions are led by the experts of Neuhaus Instructional staff and customized for educators in Grades 4-12. Build Knowledge into Practice sessions will provide: A brief review of the most important content covered in each module; new insights and practical knowledge in an interactive session with our experts; and a practical "teacher takeaway" that can be put into practice the next day!

1 | Build Knowledge into Practice Session 1

1 Foundations of Reading Instruction
